VITALLOOP

AI That Turns Blood Tests Into a Living Health System

OCR + Claude AI

85+ Biomarkers

Weekly Adaptation

Mobile-First

Privacy-First

Practitioner CRM

Lab Testing Generates Data, **Not** Decisions

High cost, zero context

Consumers spend hundreds on blood tests and receive raw numbers with no prioritization or interpretation.

Fragmented, isolated results

No memory between tests means trends and early warnings are consistently missed.

Manual interpretation is expensive

Doctors and practitioners spend hours reviewing reports that could be analyzed in seconds.

No clear next steps

Users are left without a protocol, a plan, or a path to meaningful health improvement.

LAB REPORT — NO CONTEXT

Testosterone	14.2 nmol/L ↓
Ferritin	9 µg/L ↓↓
Vitamin D	18 ng/mL ↓
TSH	2.1 mIU/L
Cortisol	620 nmol/L ↑

What do I do?

Is this serious?

What's next?

From Upload to Action in Under 60 Seconds

- 1 Ingest any lab report**
Upload any PDF or photo from any provider or country.
- 2 Extract 85+ biomarkers**
OCR + Claude LLM interprets values with clinical context and prioritization.
- 3 Personalized weekly protocol**
AI generates a concrete action plan based on user goals, risks, and history.
- 4 Longitudinal tracking**
Every test builds a richer picture — trends, improvements, and risk shifts tracked over time.
- 5 Weekly adaptation**
Recommendations evolve with each new data point — a true living health system.

BEFORE VITALOOP

14 raw values. No context. No plan. No clarity.

AFTER VITALOOP

3 priorities identified · Weekly protocol ready · Trends tracked · Adapted every week

⚡ Full analysis in under 60 seconds

A 5-Step AI Workflow for Continuous Health Optimization

STEP 01

Upload

Any lab PDF or photo from any provider. Mobile or desktop.

STEP 02

Analyze

OCR extracts values. Claude LLM interprets 85+ biomarkers with context.

STEP 03

Protocol

Personalized weekly action plan with priorities, supplements, and lifestyle steps.

STEP 04

Track

Longitudinal intelligence builds with every test. Trends visualized clearly.

STEP 05

CRM

Practitioners manage clients and issue branded white-label reports.

B2C + B2B

Large, Expanding, and Structurally Underserved

**15–24%****Annual CAGR — Biohacking & Longevity**

Fastest-growing segment in consumer health, driven by prevention-first mindset.

\$45B+**Global Market by 2026**

Biohacking, longevity, and personalized wellness combined.

3 ICP**Biohackers · Athletes · Functional Medicine**

High testing frequency, high willingness to pay, and strong referral behavior.

Built, Tested, and Near Launch

Core Platform Development

80%

Validated pain, validated solution

Early feedback confirms demand for instant interpretation, weekly guidance, and longitudinal tracking.

Compounding value mechanics

The product becomes more valuable with every test — driving natural retention without marketing spend.

Practitioner-side pull

Interest driven by time savings on report interpretation and branded white-label delivery.

RETENTION LOOP

- User uploads first test
- AI delivers protocol + insights
- User uploads next test
- Longitudinal trends revealed
- Recommendations deepen and adapt
- **Product becomes irreplaceable**

AI Product Design

Building AI-native applications with Claude LLM, OCR pipelines, and biomarker intelligence at the core.

Full-Stack Execution

End-to-end product delivery: architecture, backend, mobile-first frontend, and data modeling.

Privacy-First Architecture

Supabase RLS with row-level security ensures clinical-grade data isolation for every user and practitioner.

Health Domain Knowledge

Deep understanding of biomarker interpretation, functional medicine workflows, and practitioner CRM needs.

TARGET MILESTONE

Launch readiness → early recurring revenue → clinical workflow traction → stronger Series A position

The Default **AI Layer** Between Lab Data and Better Health Decisions

VITALLOOP is building the intelligence infrastructure that makes recurring blood test data actually useful — for millions of individuals and the practitioners who serve them.

For Individuals

Clearer action, better habits, measurable outcomes from every test.

For Practitioners

Faster interpretation, stronger client retention, branded delivery.

For the Category

A trusted data layer for precision health optimization at scale.

Let's build the future of precision health →
